

Builder II OFFENSIVE RISK 6/7

Builder II (offensive) Fund · As of 30 April 2026

Net Asset Value (NAV) € 99.06 ◊ MTD -0.94% ◊ YTD -0.94%

Strategy

The Fund has an offensive profile and seeks capital growth across varying market conditions, with high volatility up to 20% (broadly comparable to developed-market equities). The recommended investment horizon is at least three years.

The portfolio combines multiple, mutually weakly correlated strategies in a partly market-neutral set-up: directional risks are partially reduced while targeted positions remain within mandate. Investments are made through carefully selected Underlying Investment Vehicles and structured strategies across equity, rates and derivatives markets.

The Fund invests globally. Currency exposure (primarily USD) is left fully or partially unhedged.

Market Comments

The Fund lost 0.94% in April (NAV 99.06). April was a volatile month in financial markets, with AI- and datacentre-driven growth on one side and geopolitical tensions around Iran on the other as key themes. Equity markets fell sharply before rebounding strongly to a new record, while rates moved higher and commodities and gold remained firm. The market-neutral digital-asset strategies, the largest part of the portfolio, ended slightly positive thanks to timely risk reduction during the turbulence in crypto markets. Commodities and energy benefited from high oil and gas prices, and the fixed-income relative-value strategy added a small gain. The biggest drag was the thematic equity strategy. Built-in downside protection cost money during the sharp rebound at the end of the month. A weaker dollar (EUR/USD from 1.16 to 1.17) also weighed on returns from the unhedged USD positions.

Allocation

The Fund currently invests in:

- Digital-asset strategies
- Commodity strategies
- Thematic equity strategies
- Fixed income
- Cash

As a fund-of-funds, the Fund invests via Underlying Investment Vehicles. The digital-asset strategies consist primarily of market-neutral or limited-directional approaches (arbitrage and relative value) and should not be read as direct long-only exposure to cryptocurrencies; the allocation is actively monitored and can be scaled back under stressed market conditions. The categories shown reflect the current composition of the portfolio and may change over time. Please refer to the prospectus for the investment policy.

Currency Exposure

Currency exposure (notably USD) is not or only partially hedged to EUR. FX moves can affect returns positively or negatively. The breakdown shown is indicative and may differ between reporting dates.

Suitability

Builder II is designed for investors seeking an offensive allocation combining market-neutral strategies with, among others, commodities and thematic equity strategies. Suitable for investors with a minimum three-year horizon who can tolerate temporary drawdowns, including FX swings. Not suitable for investors needing access to capital within months or unwilling to take FX risk.
